Kevin

Can you please republish the Falcon Refinery Site for me? I had to move the proposed plan to fix a
 SEMS error

Thanks

Kevin

Can you please publish AT&SF for me . I have made the changes to correct the error in SEMS (I
 hope).

Thanks

Sure, I can publish ATSF once you make the changes. I think I already used today's date for Delta, but will check later. If I did use today's date, I'll publish Monday.

Kevin

I went back and corrected the structure under the Source for Remedial and it is correct now. I also found the extra remedial items and deleted them. They were stuck under the Enforcement part of Source. So I think it is good to go for publishing again. I also looked at AT&SF and I think I have the same problem in SEMS, I will go and check it out as soon as I send this. Can you please publish it if I need to make corrections?

Thanks

Subject: Delta Shipyard Publishing Issues

Good morning. We are still having a couple of issues on Delta.

1. Published the site and it appears Site Manager is showing data not in Primavera, specifically the Level 5 Work Package of FF RI/FS.
2. The RPM (Brian Mueller) had several errors previously on WBS location error not being in the correct spot. He has resolved some, but others are now showing. Can any assistance

be provided on efficient ways to resolve the issue? We see this error somewhat frequently, so any solution would be helpful to many of the staff in the region. The latest error log is below.

WBS LOCATION ERROR
Name: GOVT Proposed Plan (001), WBS Code: 0531E-RIFS-1-1, Activity Sub-Category Object ID: 7880941, Site ID: 0600444, Refresh Schedule Log ID: 615526
This error can occur if the Work Package has been placed in the wrong location in the WBS. Please ensure that the Work Package has been added to the same location that is shown in the Master Template when drilling down using the "Add WBS from Template" function.

WBS LOCATION ERROR
Name: GOVT Proposed Plan (001), WBS Code: 0531E-RIFS-1-1, Activity Sub-Category Object ID: 7880941, Site ID: 0600444, Refresh Schedule Log ID: 615526
This error can occur if the Work Package has been placed in the wrong location in the WBS. Please ensure that the Work Package has been added to the same location that is shown in the Master Template when drilling down using the "Add WBS from Template" function.

WBS LOCATION ERROR
